GitHub

Languages:

English: B1

Russian: native

Summary

Looking for a job in the field of manual/automated testing. Completed manual, automated and load testing courses from TQuality (half a year each). I have good knowledge of Java and testing theory. Willing to put my best efforts to become a great AQA engineer. Friendly, do sports, easy to find common language with people.

Work experience:

There is an internship project that was developed over 3 months in a team under the supervision of mentors. You can find it on GitHub:
