## Programming Languages:

Java – intermediate
C++ – basics
TS / JS – basics

## Skills

Java Core, Java EE, Collections, Junit (4), Maven, Log4j2, JPA + Criteria, JDBC
Jira, Я.Трекер, JMeter + Grafana, Selenium, Postman
Relational databases: MySQL, SQL Server, SQLite, PostgreSQL
Knowledge of common algorithms and data structures, OOP, SOLID, Design Patterns, REST, SOAP, Unit Testing
GitHub

## Languages:

English: B1
Russian: native

## Summary

I am currently a third year student at BSU. I am interested in such areas as Java Backend, Android Development and QA (Automation). In the fifth semester I took a training course on Manual Testing as part of the curriculum, at the moment I am taking a course on test automation, as well as writing a term paper on "Performance Testing of Web Applications" (Using JMeter and Grafana).

## Work experience:

I have no commercial development experience, but would be glad to add something relevant.
You can find some of my projects on GitHub:
